Source Data:

The crime related data contained in this report are derived from a number of computer sources. These systems include, but are not limited to:

eCOPS	-	Enterprise Case Occurrence Processing System
COPS	-	Computerized Occurrence Processing System
CIPS	-	Criminal Information Processing System

These systems are continuously being updated and as a result some changes to statistics published in previous statistical reports should be expected.

Crime statistics contained in this report are based on the date that the information was reported or became known to police. This is done to minimize changes in reported statistics year over year and to enable some degree of comparability with statistics reported by Statistics Canada.

Other data comes from a mixture of automated and manual systems maintained by the individual units responsible.

Comparing Crime Statistics:

The statistics in this report count all offences reported to the police. As a result, a single incident reported to police may generate more than one offence.

It is not recommended that the crime statistics in this report be compared to crime statistics prepared by other agencies due to the fact that different methods of categorization, geographic, technical, data and time constraints may affect the outcome.

Although comparing exact numbers is not recommended, the general trends and magnitude of change should be similar regardless of the counting method.

Detailed information pertaining to Statistics Canada crime reporting method can be found in the Uniform Crime Reporting Survey documents posted on the Statistics Canada website, <http://www.statcan.gc.ca>.
